

VACCINE REFRIGERATORS

Worry-free temperature control with phase-change material (PCM) cooling technology

TempArmour® pharmaceutical-grade refrigerators ensure consistent in-range temperatures for everyday use and during outages – no water bottles, backup power, or remote monitoring required.

Up to 6 Days of Outage Protection

Take advantage of stable PCM technology for in-range temperatures during outages.

Reduced Cold Chain Incidents

Eliminate temperature excursions or vaccine loss and minimize paperwork.

Designed for Daily Use

Enjoy easy access with a chest-style configuration designed to save time and reduce user error.

Versatile, Effective Refrigeration

Experience reliable pharmaceutical-grade storage for blood, medicine, and more.

Meets Vaccines for Children (VFC) Requirements

Meet CDC and Vaccines for Children program guidelines using refrigeration and data loggers calibrated for compliance.

TempArmour Vaccine Refrigerator (Model BFRV84)

Tap into worry-free refrigeration with the original TempArmour refrigerator (38" x 28" x 35"), which keeps temperatures within a 2°C to 8°C range during an outage for **six days**.

- ✓ PCM lining for uniform temperatures
- ✓ Chest configuration traps cold air
- ✓ No backup power needed
- ✓ Comprehensive organization system
- ✓ Exceptionally low power consumption
- ✓ No scheduled maintenance required
- ✓ Holds more than 2,000* vaccine or medicine doses

**200 boxes of 10x0.5ml vials or 70 boxes of 10 single-dose syringes (based on typical manufacturer box sizes)*

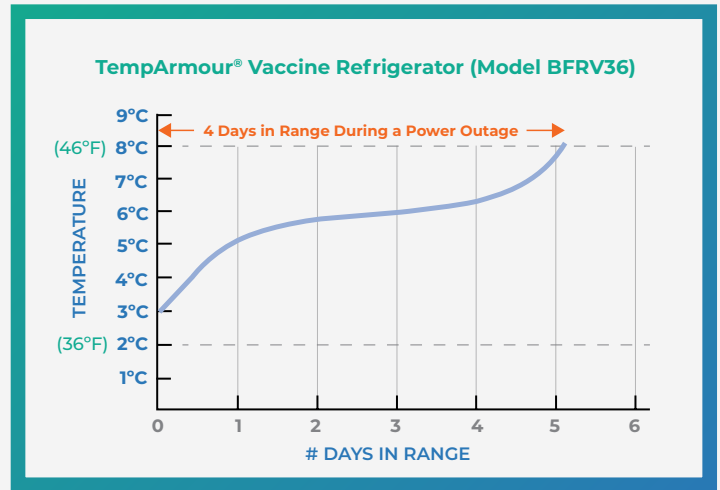

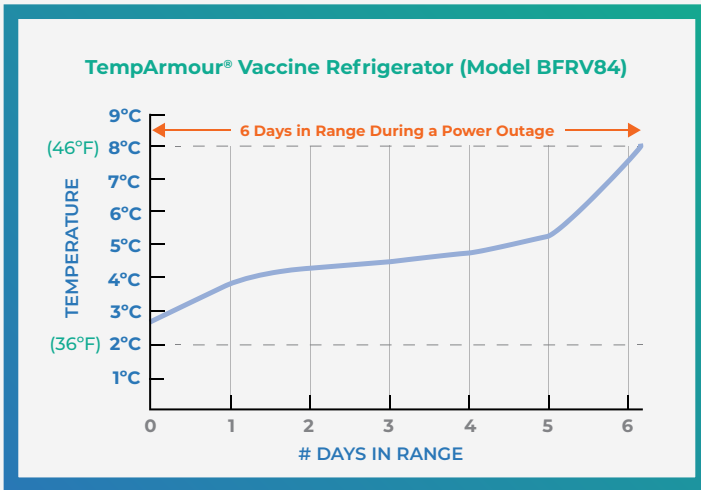

TempArmour Vaccine Refrigerator (Model BFRV36)

The compact BFRV36 model (26.5" x 25" x 31") uses the same advanced technology and design to maintain critical temperatures for up to **four days** without power.

- ✓ Storage capacity for more than 1,300 doses* in a unit
- ✓ Tailored organization system to maximize space
- ✓ Ideal for pharmacies, vaccine clinics, or smaller facilities

**130 boxes of 10x0.5ml vials or 30 boxes of 10 single-dose syringes (based on typical manufacturer box sizes)*

Reliable Refrigeration Day After Day

"I purchased a TempArmour refrigerator about a year ago and have tested it extensively. The temperature is constant from day to day AND the temperature shows very little variability regardless of its placement in the refrigerator."

Ken F.

Peace of Mind Is Within Range

Take the pain (and water bottles) out of temperature-sensitive storage with TempArmour's reliable temperatures and purpose-built design.
